

PIAGGIO LIBERTY 125 ABS

The new Piaggio design technology icon is born, interpreting the unique personality and distinctive style of Liberty with a contemporary and fresh look. After 18 years of successes and over 800,000 vehicles sold, Liberty takes on a new shape in the new Piaggio Liberty, the high-performing scooter that summarizes the contemporary easy chic spirit. The design combines with the highest safety and technology standards, including the ABS mounted as standard (on 125 and 150 cc models) and the new i-get engine family, in a high-wheeled scooter symbolizing freedom, independence and attention to details.

The elegant and curvy lines of the new Piaggio Liberty are embellished by chrome-plated finishes and LED front lights on 125 and 150 cc models. The vehicle structure and size and the high wheels give off a stable and safe sensation even to first-time scooter riders. The rear-mounted passenger footrests combine with hi-tech and functional elements, such as the spacious under-seat compartment, openable with electric control, and the analogue-digital instruments with LCD display, enhancing comfort during the ride.
